Forecast for Tuesday 09 May 2023

Weather: A rather cloudy start, with some patchy drizzle overnight and early morning. Brightening up to a mixture of sunshine and showers from mid-morning, these will be locally heavy, with the risk of thunder and hail. Any showers will gradually decay and fade by the evening, with some clear spells developing.

Chance of cloud-free hill tops above 600m: 20% during the morning, improving to 80%, with brief deteriorations in heavy showers, especially in the afternoon.

Low cloud and visibility: Extensive low cloud, with bases down to 400-500m overnight and early morning, lifting to above the summits from mid-morning. Poor or very poor visibility in early low cloud and drizzle, becoming mostly good or very good, but temporarily poor in heavy showers during the day.

Meteorologist's View

Low cloud and drizzle will reduce visibility and make navigation difficult at height during the morning. Care should be taken if heading out in the hills in the afternoon, with the chance of heavy and possibly thundery downpours. Risk of hail and lightning additional hazards.
